

The company for renewable energies

RWE Innogy pools the expertise and power plants of the RWE Group in the area of renewable energies. The company plans, builds and operates facilities for renewable power generation and energy production. It aims to develop power generation quickly on this basis in the UK and Continental Europe. Growth will be aligned with the political goals at national and European level.

The focus of the company is clearly on wind power projects in the European on- and offshore sector. However, RWE Innogy will also grow in the areas of hydroelectricity and biomass. Solar and geothermal energy as well as wave and tidal power plants are other areas of the company's activities. Innovation is another key focus. In this context, RWE Innogy is not only focused on classical research and development, but also invests in selected promising up and coming technology companies.

"The main focus of our commitment is the increased use of windpower."

Prof. Fritz Vahrenholt, Chief Executive Officer of RWE Innogy

For the RWE Innogy GmbH at our location in Essen there are several vacancies for a

Venture Capital Analyst / Associate (m/f)

The Corporate Venture Capital arm of RWE Innogy invests into emerging and innovative companies in the renewables market across Europe to position RWE Innogy as a driver of future technologies and to contribute to the long term growth perspectives of RWE. The Venture activities link Venture Capital investments with the strategic business development, R&D efforts and our power production facilities.

Apart from the financial and technological support, we provide our portfolio companies with management know-how in day-to-day operations, strategy and organization.

Your tasks:

- Support the deal makers in conducting quantitative and qualitative analysis and due diligence on new investment opportunities across Europe
- Perform technology and market research with respect to a particular investment or an industry as a whole
- Prioritize investment opportunities and effectively escalate investment decision making
- Support monitoring of existing portfolio companies
- Work closely with colleagues, lawyers, accountants, industry experts and other contacts in our network

Your profile:

- Strong academic record with a finance or science focus, a combination of both would be advantageous
- Work experience in energy markets, especially renewables advantageous OR work experience gained in Venture Capital or

Private Equity, ideally with a tech focus or in a business development or commercial role in technology business

- Exceptional financial, numerical and analytical skills combined with proficient knowledge of relevant software
- Proactive, entrepreneurial, results oriented individual with an ability to work effectively in a non-structured non-hierarchical environment
- High level of self-motivation and persistence
- Outstanding interpersonal and team working skills
- Excellent written and oral communication skills in English, knowledge of other EU languages would be an advantage

The RWE Innogy GmbH is committed to equal opportunity and diversity and welcomes applications from all sections of the community.

Are you interested? Please submit your application, preferably online.

We look forward to your application!
